

Sound Prosperity Zimbabwe Foundation registered August 4, 2017.

It is a part of Sound Prosperity Social Organization Switzerland.

Sound Prosperity is non-political and non-religious.

**Sound Prosperity is NOT a CHARITY organization, but a BUSINESS organization.**

### **The Vision of Sound Prosperity.**

Sound Prosperity envisions that all people can have a life, with dignity and enough financial support to live such a life. We want to positively encourage people, and especially the youth, to start businesses and support their community by providing jobs. We are not on the look for diploma's but for right mindset! We will identify areas in need of development. Many of our certified educators are working in rural areas already.

Sound Prosperity envisions a community where all people live together, support each other to reach their goals. There is no envy, no greed, but the understanding that only Together Everyone Achieves More. That is the reason we work with TEAMS. There is no hierarchy. We believe that all people should take responsibility for their lives. That is why we have extensive Mindset training.

Sound Prosperity envision cities, where the council is working *with us* to flourish. We envision a country where the government is embracing the fact that, through commerce, you can reach each goal.

Health is an important issue in our organization, for too many people die or suffer through the lack of proper healthcare. But the biggest illness of all is greed, jealousy, and the endless power struggles. We NEED to understand that ONLY TOGETHER we can achieve more. Therefore we call ALL, police, cities, churches, communities to support us in changing this destroying thinking.

Sound Prosperity is working with the digital currency SPURT. (MySPURT.org)

This is connected to the Cryptocurrency SPURT+

Through this combination, we can support the people to have a better life.

### **Advantages for people, having no job, no hope, no future.**

Jobs are provided by supporting the community. Starting small businesses is highly stimulated. Payment for these jobs and the wages of the starting businesses is provided in SPURT. These received SPURT can be used to buy products and services, pay off debts and even buy houses when enough SPURT is saved. All this is accompanied by stimulating the people to think differently, have the courage to find out what they can do what they LOVE to do. This is motivating the people to think on what they, as a TEAM can do for others.

We want children to take responsibility too and be creative. For that purpose, we start clubs outside of the school, where they can learn what they don't learn in school. It need to be FUN! It can be to build something they have in their head, build together something to play with. Computer skills. Children who can learn what they NEED in live, like how what money is, will have a better start, for we further them to do what they LIKE to do and be GOOD in that. Sports are part of that too. After school activities make it possible for parents to work.

## **Advantages for businesses. (We see anyone accepting funds for their products and services as a business, even churches.)**

Businesses accepting SPURT for their products or services will be able to sell more stuff, because many people have SPURT to pay for the products. To be able to re-stock, businesses can exchange SPURT into SPURT+Crypto which is exchangeable very soon now.

SPURT+Crypto is a special Cryptocurrency. It is not fluctuating in value, like Bitcoin, and there cannot be speculation with it. It is a SOCIAL coin, which makes it almost unique in the Crypto world. The value is set to 1 SPURT: 3 Euro.

But Businesses accepting SPURT have more advantages. They can attract people to work for them and get paid, during the first year, for those people in SPURT, which they will accept. **Not only that, the employer is receiving the SAME amount as paid to the employee.** This will be a building capital the business can use to grow its business.

Apprenticeships can be offered to youngsters and adults, to learn a profession. Here will Sound Prosperity even pay during all the years necessary to make the training for the profession successful and the scholar can be full employable. One day a week, the scholar will go to special training to learn specific things necessary to be a well-educated person. This is also paid for in SPURT.

Businesses who buy the stock or things they need to grow their business and pay for it with SPURT, get 25% compensation of the buying price.

Businesses working with Sound Prosperity can also offer a business plan in case they want to enlarge their business. Or they can sell their future production and receive SPURT that way. This would also cause the City and the Country to profit from this deal. Please read the information on this concept.

<http://myspurt.org/business-for-all/business-concept-for-spurt>.

## **Advantage for the city and the country.**

Sound Prosperity is offering the City and the Country to buy Tax Credits from them for the full amount of outstanding debt on taxes, and even buy Tax Credits for future Taxes. The SPURT received can be used for Infrastructure or any project the city or the country might plan.

But not only that. With SPURT we can support you to do all projects you might have in mind. Hospitals with the newest instruments and equipment to help the people, a good health care system to keep the people healthy, houses, good schools, roads, bridges, water pumps, a cultural center, whatever you want to start. SPURT IS the doorway to that.

We will need to learn how we can combine that all, but the basic is there and available in SPURT right away.

The basic model for businesses, as shown above, is in fact, also applicable to a government or city, which could sell water production or electricity. <http://myspurt.org/business-for-all/business-concept-for-spurt>.

With this Business model, also ALL things you would sell to people outside China can be bought by Sound Prosperity. You don't need to SELL anything and get rid of your ASSETS. It is your VALUE. YOU CANNOT SELL YOUR ASSETS. We offer you to buy those assets from you and, if you are not corrupt, you can buy it back in a few years, paying with SPURT you receive from the people, or through the Tax Credits.

## Advantages for schools and Universities.

A school or University accepting SPURT for their fees has the big advantages that all people can pay for the school fees and levies and that there is no outstanding debt anymore. That causes that, finally, Computers and other material can be bought. Since we see a school as a BUSINESS, you can profit from all the opportunities offered to business people.

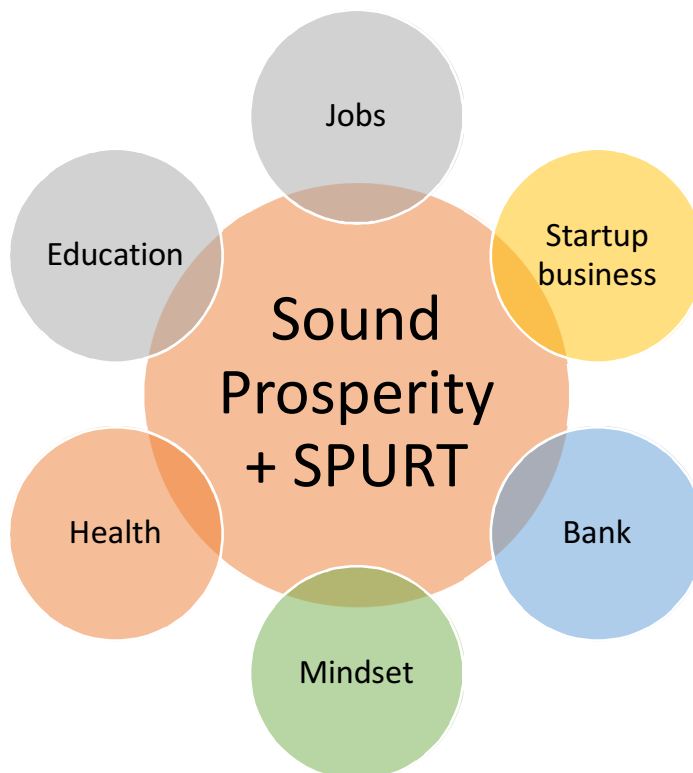

## Advantages for the hospitals, doctors, and healthcare.

We will support to adjust the wages of doctors and nurses so that they have a good income for the important work they do. We offer that hospitals will have better equipment and excellent hygiene.

Also, hospitals and doctors are businesses.

In the below graphic we show you what parts are all connected to us.

You might see that the word bank is added. We now have a bank in Zimbabwe, which main front business will be to provide loans to small and middle-class businesses, with a good system to learn how to pay back. In the background, big business will be done to make it possible to exchange SPURT+Crypto and to provide money for all kinds of projects in Zimbabwe.

All this will be done for Zimbabwean people by Zimbabwean people, although in the bank there might be some who need first to teach our system.

There is a GREAT need for HONESTY because the name SOUND PROSPERITY shows that we do NOT accept corruption and greed.

We learned in the meantime that jealousy, envy and greed and corruption are the biggest illnesses of Zimbabwe. For that reason, we offer Mindset classes, to train the people that ONLY TOGETHER we are strong.

We invite all of you seeing this message, to join us.

Thank you for your interest in Sound Prosperity and SPURT.
