

REQUEST TO BRING THE SOUND PROSPERITY AND MYSPURT IDEA TO YOUR CITY

The Sound Prosperity Zimbabwe Foundation is offering jobs, education, health and hope.

We hope that you grant the certified educators of our Foundation the right to teach the people in your city that we want to support them to start working and start setting up small businesses.

We hope we can work together very closely to make your city an example of how working with Sound Prosperity and SPURT can boost the economy. We started in Bulawayo, where now more than 13.000 people found work and HOPE. We are spreading to other cities in Zimbabwe and even other African Countries too, besides the international part that was there already.

Grow of businesses

We pay the people with SPURT and businesses can accept SPURT for the products they deliver. Businesses are allowed to receive SPURT+Crypto for the SPURT they receive from our clients and members. There will be a flow of money into the businesses. That will bring taxes in your pocket. We can discuss all kinds of advantages for your city, once there are clients enough to be of interest to you. If you can, one day, accept SPURT too, you can receive SPURT+Crypto, and exchange that for other currencies, OR use them to buy things you might need for the city.

Schools

Another item we tackle is for schools to accept SPURT for the levies. It would be great if all schools would accept SPURT because there is something good about this: The people can pay the school fee and the school, seen as a business, can pay an additional bonus to the educators in SPURT, so that they are better motivated.

Besides that, the school earns the same amount they pay to the educators to boost the school and be able to buy computers and books, perhaps repair things. We could even offer them the possibility to make a business plan for things they need. This will bring more jobs, for educators without a job, will be able to teach, since more children can go to school.

Health Care

A big problem is also Health Care. Doctors and nurses need to have better payment and there need to be better, more modern equipment. We have teams that would do cleaning and renovations. We heard that there is one kidney dialysis machine in the whole country. You need one at least in Bulawayo. But that is only an example. It is not good that your people die, because they cannot afford assistance.

We want to support you to make your people healthier. The poorness of many people causes them to eat unhealthy food, just to have something in their stomach. Many youngsters are without hope, drinking alcohol and using drugs. What if we can send out teams to make the people AWARE of the necessity to eat healthy. TOO many people are overweight, which is a real challenge for their health.

Are you interested in making your people healthier and wealthier?

We need your support in this!

Projects

But not only that. Please offer us projects you think are very important for your city. Let us talk on how we can find a way for funding. We have a fund, created by our richer clients for this purpose. Whatever you want to start. SPURT IS the doorway.

Tax credits

Since you are able to require taxes, you are also able to sell us Tax Credits. You can sell us Tax Credits for all the outstanding debts and even for future payment. We will pay you in SPURT+Crypto, which is exchangeable very soon now. Those Tax Credits could then be bought and paid for in SPURT by our clients. They are debt free, which is GOOD for the city, and you will have upfront money. You are no longer sitting on unpaid debt and your money can flow again.

Do NOT sell anything of value to any foreign person.

Your assets are your value! To sell those to the greedy people coming in your country right now for funding is not wise, not for your city and not for your country! We can buy anything from you, you want to sell (lack of money would be the motivation), with the promise that you can buy it back with SPURT. There is a restriction. No corruption, no pocket filling by leading politicians.

Responsibility of the people involved

Since a big part of what we are doing is based on teaching people that they have to take responsibility for their own life, we would really appreciate if you influence Internet providers to accept SPURT, for most of the wisdom is easy to be accessed by the internet. In fact, we believe that high internet prices in developing countries are used to control the people. If you want your city flourish, if you want your people to go out in the country and be an example of flourishing and abundance, if you want your city to be an example SPURT city in Zimbabwe, then that would certainly be something to look at, for the MySPURT accounts are all accessible through a mobile app, and our education not only in the field, through our educators, but also online.

Since greed, envy and jealousy are dominant in your country, we decided to stop requiring ANY fee from any person, when they want to work with us.

One of our rules is that we are not bound to politics or religion. That might be a challenge for you, but we are sure you can respect those rules.

Corruption is NOT part of our program. We are for **SOUND** Prosperity. ALL will have a better life, not just some.

So, we request your permission to work on the field with the people and give them a life they want to live. Give them hope, and the will to be a productive part of your community. One day we might come to you and discuss the above-mentioned examples of how we work.

We invite you to be the light of your city. The hope people need now. Are you ready for this change in your city?

We are here to support you!
